SHIBAURA

The **Shibaura SG280** is a remarkable mower, designed for mowing on slopes in as much comfort and confidence as on the flat, and complies with health and safety regulations.

Look at some of the amazing Features:

- Unrivalled safety and operator confidence. Certified to safely mow at an angle of 30 degrees
- Tilt-adjustable seat compensates for working angle, and ensures correct operator posture
- Certified ROPS and seat-belt standard
- A 28hp Shibaura 3-cylinder diesel engine that meets the stringent US EPA Interim Tier 3, as well as EU DGXI Stage 3 Emission regulations
- Shaft drive to hydraulic pump
- Foot-controlled Hydrostatic transmission with High Range 2WD and Low range 4WD in forward and reverse.
- Excellently designed hydraulic drive system to minimise noise and maximise driveability
- Up to 610 nm of torque delivery direct to the wheels
- Hydraulic transmission braking stops the mower once the operator's foot is removed from the pedal, even on steep slopes, in forward or reverse
- Hydraulic power steering
- Wide wheelbase contributes to low centre of gravity for great stability
- Hydraulic deck-lift and PTO Shaft drive to cutting deck
- Re-inforced 60 inch high volume side-discharge cutting deck. (rubber chute optional)
- 26 litre fuel tank
- Overall length 2.495m. Overall width 1.59m. Track width 1.31m. Total weight 930kg
- 2 Year or 1,500 hour Commercial Warranty (Whichever comes first)

Fully Imported from Japan

PRICES WILL FLUCTUATE DUE TO EXCHANGE RATES P.O.A.

TESTIMONIALS HEREUNDER

We purchased a Shibaura SG280 Slope Mower from Macarthur Mowers and Marine in November last year, and mainly on the strength of our family having dealt with them for over 25 years. We have been more than impressed with the mower, as it has far-exceeded our expectations, especially as it is a new Brand, and a new model in the marketplace. One of the reasons that we purchased the mower is the back-up service that our business has always received from Macarthur Mowers over the years, and the fact that they have always sourced high quality equipment for sale to Contractors like ourselves. I would honestly recommend this mower to anyone wishing to purchase a quality Commercial Ride-on with the SG280's unique capabilities.

Macarthur Mowers and Marine have been the back-bone of our School's supply and servicing of Mowing equipment for the last 28 years, and we have generally purchased on their advice and subsequent demonstration of product. After seeing the Shibaura SG280 in action last year, seeing it's ability to climb and mow on steep banks, it's speed on the flat, and the quality of cut in any conditions, we had no option but to put our faith in this excellent Japanese-made mower. Also, supporting our judgement was knowing the after-sales service that we knew we could expect from Macarthur Mowers.

We have a lot of steep areas to mow here at the Aged Care Facility Stockton, and we had to purchase a mower that we knew would be safe for our operators. The Shibaura SG280, being certified to mow safely at angles up to 30 degrees, out-performed other mowers that we had demonstrations on, and has been probably the best mower that we have ever purchased. We are a long way from Macarthur Mowers and Marine in Camden, but distance has never been a problem for them, giving us a couple of demonstrations, then delivering the mower and providing operator training and certificates for each operator. Their service has been first class and I would recommend their business to anyone. And the Shibaura SG280, what a mower. Exceptional.
